Warranty:

1. If calibration services have been previously provided by a 3rd party, and repair services are requested to Mitutoyo Field Service, parts only warranty applies and are warrantied for 30 days. If calibration and repair services have been provided by Mitutoyo Field Service, full 90 day warranty applies, covering parts and labor. In all cases part may only be installed by a Mitutoyo Field Service technician directly. All warranties are null and void if parts are damaged due to water, oil, chemicals and electrical surge.
2. As machines are affected by environmental conditions, as well as operation applications, Calibration Services are not covered by a warranty period. We highly recommend that customers measure a commonly run master part, to verify the machine is within Specifications and machines limitations, prior to signing calibration work order.
3. If machine is moved without the assistance of MAC Field service or exported to outside of USA, warranty is void.
4. All calibration, maintenance and repair service must be performed by Mitutoyo America Corporation. The use of third party vendors for calibration, maintenance or repair service will void the warranty.

Missing/damaged items:

1. It is the policy of Mitutoyo America Corporation that we will not take any part of your machine away from your premises without your express written consent. These commodities, technology, or software are sold for use or consumption within the United States only. Any subsequent export, transfer, resale or other disposition of these items from the United States must be made in accordance with the US Export Administration Regulations. Diversion contrary to U.S. law is prohibited.
